

DRUGS SUPPORT POLICY FOR STUDENTS

Revised June 2021

To be reviewed June 2022

This policy should be read in conjunction with the OxSFC COVID-19 policy that overrides the guidelines/procedures in this policy, where appropriate. The guiding principle will always be to maintain the health and safety of all stakeholders.

Policy Aim

This Policy aims to support students with drug problems or potential drug problems

Support and Advice

Once a student has been suspected of drug use or found with drugs a decision will be taken by the Principal as to whether the student may remain in the college. This will be dealt with via the Alcohol, drugs and smoking Policy.

If a student is suspected of drug use or found with drugs they will immediately be directed to their Senior Tutor (ST) and then the Vice Principal) (or other senior manager in their absence).

The ST will have a friendly sensitive talk with the student. Firstly to ascertain if there is any immediate danger to the student, secondly to ascertain what the longer term issues around care/abuse might be.

Procedures

The ST will explain that it is illegal to buy, sell, give or use drugs and the implications of being caught by the Police would be discussed: the possibility of being arrested and how this would jeopardize their future for University, work, visa application etc. The ST will also discuss the implications on health issues through abuse of drugs.

All student's conversations will be recorded onto Drugs Incident Report by the Vice Principal.

The ST will then refer individuals to drug counsellors, outside agencies and other medical practitioners as deemed appropriate.

The ST will continue to support the student with regular check-ins (frequency pending each situation) and records will be added to the Drugs Incident Log.

The ST will discuss with the Vice Principal (or other senior manager) with regard to information shared with the parents.
